## EXPERIENCE

**Start Studio**                                                                                                     Spanish Fork, UT
*Frontend Developer*                                                                                      November 2022 – Present
- Collaborate with clients and management to identify goals for a given project
- Design and redesign application software focusing on efficiency and effectiveness
- Scaffold websites to emulate a given design with precision
- Write robust, elegant code
- Implement advanced concepts in modern frameworks to create modern websites
- Troubleshoot software and test applications

**AFConnect**                                                                                                       American Fork, UT
*Internet Technician*                                                                              October 2021 – December 2022
- Composed internet networks, connections, and cabling within a city-wide internet network
- Diagnosed system failures and bottlenecks of the broader internet network
- Aided users with internet connectivity issues by tracing symptoms upstream and identifying points of failure
- Configured software and assessed hardware to solve problems in local network infrastructure

**CertainTeed, Inc.**                                                                                                        Orem, UT
*Machine Operator*                                                                                        May 2021 – August 2021
- Manufactured plastic fence panels and posts by managing powdered resin recipes, operating a rotational molding machine, cleaning ovens, and maintaining part and mold quality
- Communicated effectively with supervisors and managers to improve safety and quality of parts

**Sprouts Farmer's Market**                                                                                   Salt Lake City, UT
*Cashier*                                                                                                         January 2021 – May 2021
- Collected payments, answered phone calls, and ensured store organization and cleanliness
- Finalized customer transactions while providing exceptional customer service even during busiest hours of operation
- Restocked depleted shelves and products in a neat fashion for better access and inventory control

## EDUCATION

**Mountainland Applied Technical College**                                                                          Lehi, UT
*Web Design and Development*                                                               January 2022 – January 2023
- Developed highly interactive web applications utilizing JavaScript, HTML, CSS, React, and Angular
- Wrote clean, modular server- and client-side code with modern technologies such as Node.js and REST
- Created applications to efficiently and effectively communicate with SQL and NoSQL databases, employing full CRUD functionality

## SKILLS AND STRENGTHS

- Strong proficiency in React, Angular, TypeScript, HTML, SCSS, GraphQL, REST API, Figma
- Familiar with Flutter, Vue, Java, PHP, C#, SQL and database management, AWS, web security, and more
- Dynamic web developer building broad knowledge and concentrated skills
